

Post Doc for Machine Learning and Computational Materials Modeling at University of Seville

The [Theoretical Chemistry group](#) has an immediate opening for a postdoctoral scholar in the Physical Chemistry Department at the University of Seville (Spain). The two-year position will focus on the project: “Exploring and Optimizing the Thermoelectric Efficiency of New Skutterdites by Combining Databases, High-Throughput Frameworks, Atomistic Simulations and Machine Learning”

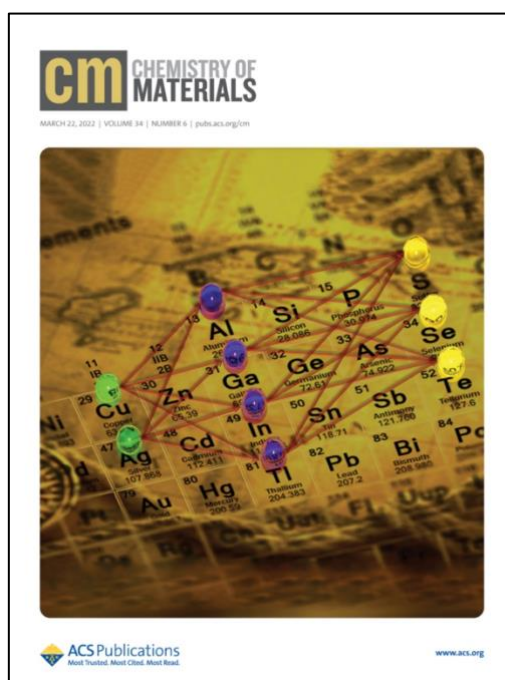

Requirements:

- Ph.D. in Chemistry, Materials Science, Physics, or Data Science completed before the contract starts.
- Experience in DFT studies of materials using VASP.
- Excellent writing skills and fluency in English.
- Knowledge of shell scripting and Python.
- Background in Machine Learning methods applied to DFT simulations and data analysis.

Applications should contain the following documents, combined into a single PDF file:

- Cover Letter
- Curriculum Vitae
- Publication List
- Contact details of at least two references (including Ph.D. supervisor) willing to provide recommendation letters.

Applications may be submitted via email to [Prof. Jose J. Plata \(jplata@us.es\)](mailto:jplata@us.es) using the subject: Postdoc-ML
