

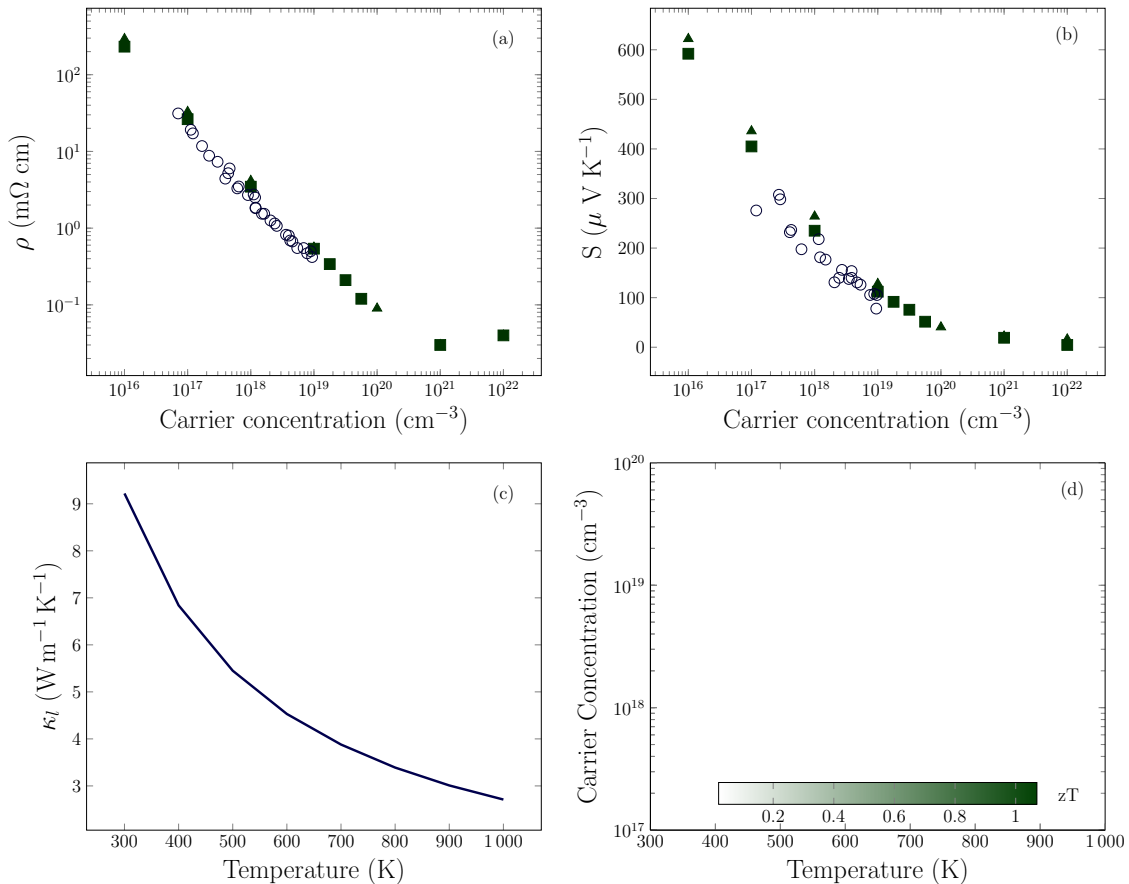

Fig. 4. (a) Resistivity,  $\rho$ , and (b) Seebeck coefficient,  $S$ , of CoSb<sub>3</sub> at 300 K. Blue empty circles represent experimental data and the Green fills triangles and squares represent calculated values with two different DFT functionals. (c) Calculated lattice thermal conductivity between 200 K and 1000 K. (d) zT for p-type CoSb<sub>3</sub>.
